PROFILE

BSc (Hons) Software Engineering graduate from York St John University (United Kingdom), with a solid technical foundation built through a Higher Vocational Training Diploma in Multi-Platform Application Development (EUSA — Seville Chamber of Commerce). With particular interest and hands-on experience applying Artificial Intelligence in developed projects. Resolute, autonomous, and a fast learner. I adapt easily to new technologies and work environments, and enjoy working as part of a team.

TECHNICAL SKILLS

Full Stack Python Java
Kotlin JavaScript Node.js
Express SQL / MySQL
HTML5 / CSS3 REST APIs
Git / GitHub Docker

LANGUAGES

Spanish **Native**
English **C1 Level**

INTERESTS

Passionate about fishing, sailing and the gym. A keen believer in sport and discipline as a way of life.

PROFESSIONAL SUMMARY

Junior developer with full-stack training and real experience building web and mobile applications, across academic projects and a company internship. BSc (Hons) Software Engineering, with a technical foundation reinforced by a Higher Vocational Training Diploma (DAM). Interested in the field of Artificial Intelligence, applied across several of his projects. Used to collaborating in multidisciplinary development teams, both in academic projects and in a real professional environment, with fluent English for working in international teams.

ACADEMIC BACKGROUND

BSc (Hons) Software Engineering

York St John University — United Kingdom

Training in full-stack development, databases, web engineering, and professional working methodologies.

Higher Vocational Training Diploma in Multi-Platform Application Development (DAM)

EUSA — Seville Chamber of Commerce

Fundamentals of object-oriented programming, databases, and multi-platform application development.

British Curriculum Education

British School of Córdoba and British School of Seville

PROJECTS

Sports Facility Booking System

2026

Final Year Project — York St John University · Flutter · Django REST Framework · Python · Artificial Intelligence · SQLite

- Full-stack sports facility booking system, with backend validation to prevent duplicate bookings.
- Includes a mechanism built in Python that analyses real-time weather data (OpenWeatherMap API) to automatically recommend the most suitable available court; evaluated using the Design Science Research methodology, with a 100% success rate in detecting booking conflicts.

Restaurant Tracker Mobile App

York St John University

Smartphone App Design and Development — Flutter · SQLite · Dart

- Android app for logging restaurant visits and rating meals, with secure authentication (SHA-256 hashing and biometric login) and a local, per-user database.
- Full automated test coverage (unit, integration, and E2E) and accessibility support via Flutter Semantics. Grade obtained: 98/100.

EXPERIENCE

Full-Stack Developer (Internship) — Indexa Geodata

Mar – Jun 2025

Trackwine — web and mobile application (Flutter)

- Development of Trackwine, a web and mobile application built with Flutter, deployed with Docker and currently in production (trackwine.es).
- Worked as part of the development team, actively collaborating on the technical implementation of the product.

Campus 42 — Telefónica

2022

Málaga, Spain

- Participant in an intensive programming camp organized by Telefónica, focused on problem-solving and teamwork under pressure.

KEY COMPETENCIES

Problem Solving

Analytical approach to breaking down technical problems and reaching functional solutions.

Fast Learning

Ability to adapt to new technologies and work environments, with flexible thinking.

Teamwork

I consider myself someone who enjoys working in a team and helping others, always bringing a collaborative attitude.

Discipline and Consistency

Consistent work habits, also reflected in my regular sporting activity.
